

## Frequently Asked Questions for Technology

### How do I connect my Chromebook to WiFi?

In the bottom-right corner of the screen, click into the area with the Wi-Fi symbol (if it isn't enabled, you'll see an outline without an available signal inside).

Click "Not connected" — you'll see the Wi-Fi button turn on and it will automatically search for local networks.

If you've already established a local Wi-Fi connection, it should automatically connect. Otherwise, select one from the available list and enter the password, or click the Wi-Fi button with the plus sign to join another network.
